

Maximize Your Memory on a New InfiniiVision HD3 Series Oscilloscope

Promotion Overview

The new Keysight InfiniiVision HD3 Series oscilloscope has 4x the resolution and half the noise thanks to its 14 bit ADC and ultra-low noise front end. This enables you to analyze the smallest signals in your designs with a high degree of accuracy. Additionally, the HD3 series features custom components optimized for oscilloscope measurements, including a new deep memory architecture. This deep memory allows you to capture longer time spans at full sample rate for better measurement and analysis results. For a limited time, you can maximize the memory depth on your new HD3 series oscilloscope (100 MPts/channel) for free!

Promotion info

Start date: September 4, 2024, **End date:** December 31, 2024

Promo code: C.4006

Webpage to claim free software: www.keysight.com/find/HD3memoryclaim

Availability: Applicable Worldwide except Greater China, Israel and countries with CIP incoterms.
