

## Press Release

### dataTec at trade events in February and March 2025

Reutlingen, February 5, 2025 - Every year, the experts for testing and measurement technology from dataTec AG are represented at B2B events for various industries that have to perform testing and measurement tasks. There, they provide information on current technical developments, standards and legislation and offer manufacturer-independent advice on suitable solutions for a wide range of measurement tasks.

On **February 25, 2025**, dataTec will be exhibiting as a partner of NI at the **NI Days**. Specialists and managers from science and industry will meet in **Munich** on this day to learn about and exchange information on trends and developments in the fields of measurement technology, automation, simulation and validation. The agenda includes technology updates and hands-on demonstrations of NI products and software solutions. Interested parties can take part in specialist presentations and breakout sessions and have the opportunity to network. The experts from dataTec will be on hand at their own stand to provide advice on individual measurement and testing technology solutions. Further information on the free event and registration at <https://events.ni.com/profile/web/index.cfm?PKWebId=0x1447620001#location>.

Together with the Swiss LabVIEW User Group, dataTec will present itself at the **Modular Measurement Technology Day** on **March 20, 2025** in **Baden, Switzerland**. There, the company invites you to the dataTec M-Day with lectures, practical application examples and expert sessions on modular measurement technology from NI. The free event is of interest to companies and institutes already working with modular measurement technology as well as those planning to use it. Information and registration at [www.datatec.eu/day-ch](http://www.datatec.eu/day-ch).

The most relevant events for the measurement and testing technology sector include the trade fair for electrical, energy, building and industry **eltefa** and the trade fair for electromagnetic compatibility **emv**. Both trade fairs will take place in **Stuttgart** from **March 25 - 27, 2025** and are must-attend events in the calendars of the experts from dataTec.

#### **eltefa: Hall 10, Stand 10E34**

At **eltefa**, product presentations and consulting will focus on the requirements of measurement and testing technology for the electrical, energy, building and industrial sectors. Among other

things, the dataTec team will be presenting the E8 Pro from the manufacturer FLIR, a thermal imaging camera ideal for applications in the preventive inspection of electrical systems. It can be used to find faults before failures occur. "We are an important, reliable partner at eye level for the electrical trade," emphasizes Jörg Scholl, Head of Electronic Measuring and Testing Technology DACH at dataTec. "Since July 2024, we have been underlining this role with our membership of the Fördergesellschaft elektrotechnischer Unternehmen (FEU). Together with the guild specialist companies, we want to master the challenges and opportunities of technological change and contribute to the further development of electrical engineering."

### **emv: Hall C2, Stand 605**

The **emv**, which takes place at the same time, is considered the central event for electromagnetic compatibility in Europe and is all about solutions for measuring and analyzing radiated power. This year, dataTec, together with Shieldex and Pendulum Instruments, will be presenting measurement technology products such as EMC scanners, compliance analyzers, EMC accessories, frequency counters, time standards and textile shielding solutions in small and large sizes. One example of the cooperation between the three companies is the EMC action bundle consisting of a shielding tent, near-field scanner and signal analyzer. Further information on the bundle can be found at: [https://emv.mesago.com/stuttgart/en/exhibitor-search.detail.html/datatec-ag/mf\\_6\\_0012212173\\_4299342\\_10000127202501.html#productheadline](https://emv.mesago.com/stuttgart/en/exhibitor-search.detail.html/datatec-ag/mf_6_0012212173_4299342_10000127202501.html#productheadline).

### **About dataTec**

dataTec AG is the leading specialised distributor for test and measurement technology in Europe. Since 2018, dataTec has been pursuing the European expansion of its sales activities and is currently active in Spain, Switzerland and Austria as well as in Sweden, Estonia and Finland. The broad product portfolio with more than 50 manufacturers includes power supply units, oscilloscopes, modular measurement technology, test systems, test equipment and thermal imaging cameras. With over 150 employees, the Swabian family-owned company advises customers from a wide range of industries and sectors – from industrial companies to public authorities and educational institutions – from its headquarters in Reutlingen.
