

## Press release

# dataTec: Three Events for Your Measurement and Testing Tasks

## Meet the Experts from dataTec | ISPSD in Bremen, 18th Silicon Saxony Days in Dresden, dataTec Day in Munich

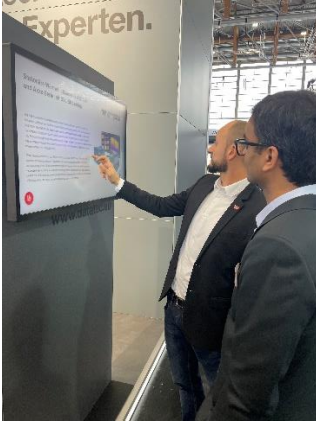

Reutlingen, May 22, 2024 - In June 2024, dataTec AG will be present at three important events to showcase its expertise in the field of measurement and testing technology. From June 2 to 6, the dataTec team invites you to the 36th International Symposium on Power Semiconductor Devices and ICs (ISPSD) in Bremen. This leading forum provides a platform for technical discussions in all areas of power semiconductor devices, integrated power circuits, hybrid technologies, and applications.

On June 11, you can meet the dataTec experts at the 18th Silicon Saxony Day in Dresden, one of the most significant international high-tech and networking events in Europe. Here, the professional audience will gain cross-industry insights into technologies and solutions in hardware, software, and connectivity. Besides knowledge and technology transfer, dataTec aims to use this networking event for open exchange with developers, manufacturers, and users of information and communication technologies.

A special highlight in June promises to be the dataTec Day on June 11 in Munich. For companies, universities, and research institutes already working with or planning to use modular measurement technology, NI (National Instruments) solutions offer a wide range of possibilities. Exciting lectures, practical application examples, and expert sessions will present these to interested parties and discuss open questions together. Participation in dataTec Day is free of charge.

The events in June offer the opportunity for intensive exchange and practical demonstrations of the latest measurement and testing devices. The experts from dataTec are ready to discuss individual challenges and develop optimal solutions. For more information and participation options, visit: <https://www.datatec.eu/de/en/dates-news>
